Unrivaled and unyielding Olde World craftsmanship and artistry as conceived, built, designed and retained by its original owner in 2008. An unwavering commitment to a timeless aesthetic standard is well evident throughout the luxurious, yet transitional interiors contained within. From the front facade forward, an immediate sense of structural integrity prevails, and a greater sense of how a superior building approach will make this Northern Belleair Beach Residence stand apart from its counterparts. Where do we begin? Perhaps we start off with the proximity, which is less than a block to the beach, and equal distance to the shoppes on sand key, and the Belleair Beach bridge. Next, let's tackle the floor plan, imagine a seamless integrated progression of a two story family room, dining area and a master chefs kitchen encased in custom wood cabinetry, stone counters, legendary gas and electric appliances...Now, let's add a covered loggia terrace that runs the length of these rooms, and well quite frankly we've achieved an exquisite indoor and outdoor living environ. Now for those of us seeking bedrooms, there are 5, no less inclusive of a gracious master suite. Bespoke ironwork, timeless flooring, hand-crafted mouldings and millwork, balanced paint treatments and breathtaking lighting
